Investtech

Investech is a multifunctional application that provides users with daily stock analysis and recommendations.

TODAY'S FREE ANALYSES

Nasdaq Combined Composite Index has broken the falling trend channel down in the medium long term. This signals an even stronger falling rate, but the negative development may result in corrections up in the short term. There is no support in the price chart and further decline is indicated. In case of a positive reaction, the index has resistance at 12600 points. The index is assessed as technically negative for the medium long term.

Meta Platforms A shows weak development in a falling trend channel in the medium long term. This signals increasing pessimism among investors and indicates further decline for Meta Platforms A. The stock has support at dollar 187 and resistance at dollar 234. Volume tops and volume bottoms correspond badly with tops and bottoms in the price. This confirms the trend. The RSI curve shows a rising trend, which is an early signal of a possible trend reversal upwards for the price as well. The stock is overall assessed as technically negative for the medium long term.

Features
